

PROP 65 SERVICES

FOR THE 2028 PROP 65 UPDATES

With over 400 enforcement notices per month, California Proposition 65 (Prop 65) is the most heavily enforced product regulation in the world. And it is changing at the start of 2028.

Starting in 2028, generic warnings will no longer be allowed. Even short form warnings will require the declaration of at least one applicable carcinogen and one applicable reproductive toxin.

Key Changes Coming in 2028

WHAT'S CHANGING?

- No more generic warning.
- A substance has to be identified.
- New labelling text options.

PREPARATION FOR PROP 65 IS THE KEY TO COMPLIANCE

Are you ready to identify a carcinogen or reproductive toxin to your customers? You likely do not have to. If you test your product properly, you will have an iron clad answer without declaring that your product causes cancer or reproductive harm.

- There are good effective methods to identify Prop 65 substances.
- Exposure testing is streamlined now - not a PhD adventure.
- A test report is your defense against the Prop 65 'bounty hunters.'

Claigan is the best in the business at Prop 65 compliance

THE CLAIGAN EXPERIENCE

California requires companies to provide warnings for overexposure to Prop 65 listed chemicals. Claigan's services have you covered with Prop 65 testing and reporting.

- 15+ Years of Prop 65 experience.
