

Required Survey under CEPA Section 71

CEPA Chemicals Management Plan

Section 71 Survey submissions are required in Canada under the Canadian Environmental Protection Act (CEPA). These surveys require you to evaluate and report on hundreds of chemicals in your products.

Claigan streamlines the entire process by combining a high-level risk assessment for all 200 chemicals with a focused approach to testing and gathering data on the chemicals that could be reportable in your products.

Claigan provides a comprehensive, three-step service to help you meet these deadlines.

What you need to know

- Mandatory chemical reporting under the CEPA updates is underway
- Claigan has a streamlined approach to Section 71 compliance
- Claigan has helped hundreds of companies in previous Section 71 submissions

Claigan's three-step solution to Section 71

The Section 71 Survey is complicated and intensive. Claigan simplifies this task through our expertise and comprehensive chemical risk assessment experience.

1. Risk assessment of every chemical against your products and components
2. Identification of substances that could be present at a declarable level
3. Develop a plan for high risk substances

**CLAIGAN MAKES
COMPLICATED CHEMICAL
REPORTING SIMPLE**

Claigan's advantage

Claigan can drill down reporting specifics for identified high risk substances with data gathering, engineering evaluation, and laboratory testing all in one place.

- Quantification of substance concentration and annual volumes
- Summarize data into reporting templates or declarations of non-engagement
- Support submission of documentation

KEY TAKEAWAYS

- Phase 1: Aug 29, 2026 - Mar 3, 2027
- Phase 2: Mar 4, 2027 - Sep 8, 2027

Claigan provides:

- A streamlined process
- Years of experience
- Services tailored to your needs
- Continuous support

Whatever your situation, Claigan has a plan. Talk to Claigan's experts today.
